Professional Summary

Computer Science and Engineering undergraduate with hands-on experience in Full Stack Development, AI-powered applications, and UNIX system programming. Skilled in building scalable web applications, Retrieval-Augmented Generation (RAG) systems, and operating system projects using C++, Python, React, Node.js, and modern web technologies. Passionate about solving real-world problems through software engineering and AI.

Education

BMS Institute of Technology and Management

Bachelor of Engineering in Computer Science and Engineering

Aug 2023 – Present

- CGPA: 8.23/10
- Expected Graduation: May 2027
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Machine Learning.

Projects

ReadRight – AI Powered Student Productivity Tool

- Built an AI-powered student productivity platform for document summarization and contextual question answering.
- Integrated LLM APIs, Pomodoro timer, scratch notes, and productivity monitoring features.
- Developed a responsive full-stack web application with an intuitive user interface.
- Tech: React, Node.js, Express.js, HTML, CSS, JavaScript.

StudyBuddy – Document Question Answering using RAG

- Developed a Retrieval-Augmented Generation (RAG) based document assistant for contextual question answering.
- Implemented document parsing, chunking, semantic retrieval, and context-aware response generation.
- Integrated retrieved document context with LLM APIs to improve response accuracy.
- Tech: Python, RAG, LLM APIs.

UNIX Shell Replica

- Developed a modular UNIX Shell in C++ implementing command parsing, process creation, file I/O redirection, pipeline execution, and signal handling using POSIX system calls.
- Built built-in commands (`cd`, `pwd`, `history`), custom utilities, and background process execution to replicate essential UNIX shell functionalities.
- Tech: C++, Linux, POSIX APIs (`fork`, `execvp`, `pipe`, `dup2`, `waitpid`).

Technical Skills

Languages: C, C++, Python, JavaScript, TypeScript, SQL

Frontend: HTML5, CSS3, React.js, Three.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

AI / ML: NumPy, Pandas, Scikit-learn, Matplotlib, RAG, LLM APIs

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, Linux, VS Code, Microsoft Office

Certifications

- Supervised Machine Learning: Regression and Classification – Stanford University / DeepLearning.AI
- Advanced Learning Algorithms – Stanford University / DeepLearning.AI
- Unsupervised Learning, Recommenders & Reinforcement Learning – Stanford University / DeepLearning.AI
- Project Management with Agile – Infosys Springboard
- Overview of Agile & DevOps – Infosys Springboard
